**NET CONTENTS:**  
1 GAL (3.79L), 9.32 LB (4.23kg)

# CYC Turf ELEVATE

## GENERAL INFORMATION

### READ ENTIRE LABEL BEFORE USING THIS PRODUCT

**ELEVATE** is engineered to deliver a lasting impression. This premium turf colorant uses specialized pigments and binders to adhere to turfgrass and maintain vibrant color through changing conditions. Whether masking chemical discoloration or boosting visual appeal. **ELEVATE** keeps turf looking healthy and uniform. Quality of results are influenced by the conditions of the turf area being treated, calibration of equipment and application rates.

### DIRECTIONS FOR USE

**DUE TO VARYING NEEDS AND VARIABLES PLEASE CONSULT YOUR LOCAL TECHNICAL REPRESENTATIVE OR TURF SPECIALIST FOR SPECIFIC RECOMMENDATIONS.**

**SHAKE OR AGITATE WELL BEFORE MIXING.  
DO NOT ALLOW TO FREEZE.**

For best results of application, cut turf to desired height, remove debris such as clippings, leaves, and worm castings prior to application of **ELEVATE**. Keep in mind product distribution can be affected by the following: nozzle types, system pressure, spray angle and water carrier volume. Overspray on the following areas should be avoided if color is not desired: curbing, concrete, tee markers or other objects. Shake, agitate or stir colorant thoroughly before mixing into tank. Recirculation/agitation is required prior to and during application.

**Tank mixing:** Fill tank with half of the total required water, add colorant with tank agitation running, add final half of required water.

**Compatibility:** Mixing **ELEVATE** with other products containing pigments or colorants is not recommended. Undesired color and performance may result from this. **ELEVATE** may be applied in conjunction with many pesticides and fertilizers. A compatibility test is recommended if the desired combination has not been previously used. In this situation, apply the spray solution to a small test area of turf to determine if outcome is desirable.

**Equipment:** Prior to and after use of **ELEVATE** all internal and external pieces and parts of equipment should be thoroughly rinsed and washed.

### RECOMMENDED RATES

Apply at 8-24 oz. per acre. Adjust rate based on turf condition and desired color depth.

Coverage may vary depending on spray system and turf health.
